

# Artificial Intelligence

# Company Description

We would like to take the opportunity to introduce our company Webtunix Solutions Private Limited-Artificial Intelligence Organization It started in 2015, is a service based firm specially targeting the Artificial Intelligence, Machine Learning, and DataScience. As Machine Learning is a growing demand in present era, we are serving the most demanding clients with a successful track record. Webtunix can bring you the benefits of working with a partner with software skills, networking expertise, Machine Learning models, and project management experience and domain knowledge in every aspect of Information Technology.

**We work in different domains of AI (Artificial Intelligence), Deep Learning, NLP, Machine Learning which covers, Web and Data Analysis.**

In this respect we would like to extend our interest to make collaboration with you for services of Artificial Intelligence. We believe that our services can well compliment your customer services thus improve total customer satisfaction. If you are interested for this collaboration so as to outsourcing with us we can further proceed towards next step. After checking our company's introductory profile or you may peruse our website at [www.webtunix.com](http://www.webtunix.com), If you have any question or interested in this collaboration you can further contact us.

**We hope to receive your favorably Response Soon**

## **MISSION**

---

To emerge as a leader in the Indian "Information-Technology" industry – through total customer satisfaction & employee motivation

## **OBJECTIVES**

---

- To provide efficient and cost-effective solutions to complex information management requirements through innovative application of the latest in technology.
- To provide an informal yet highly professional environment to our workforce and nurture them towards identifying the organization's goals as their personal targets
- To achieve excellence in every sphere of operation

## **QUALITY POLICY**

---

In this respect we would like to extend our interest to make collaboration with you for services of Artificial Intelligence. We believe that our services can well compliment your customer services thus improve total customer satisfaction. If you are interested for this collaboration so as to outsourcing with us we can further proceed towards next step. After checking our company's introductory profile or you may peruse our website at [www.webtunix.com](http://www.webtunix.com), If you have any question or interested in this collaboration you can further contact us.

## A Brief Note on the Services Offered by Webtunix is as Follows

**Webtunix** spotted the potential of the Indian Software Industry in its teething stages and developed various enterprise applications and off the shelf software products, which were focused around the customer's business processes. Only firm who is well expert in AI, Recommendation System, Tensor-flow, Keras, Big Data, Deep Learning, AWS, and Database Management.

We provide the requisite knowledge and skills to evaluate some of the central techniques of Artificial Intelligence such as search and use of heuristic knowledge. Top most services, we are working over under the Machine Learning and Deep Learning. Machine Learning is a type of Artificial Intelligence that provides computers with the ability to learn without being explicitly programmed. The process of Machine Learning is similar to that of data mining. AI is Intelligence exhibited by machines. In computers science, an ideal Intelligent Machine is a flexible rational agent that perceives its environment & takes actions that maximize its chances of success at some goal.

### SOFTWARE DEVELOPMENT

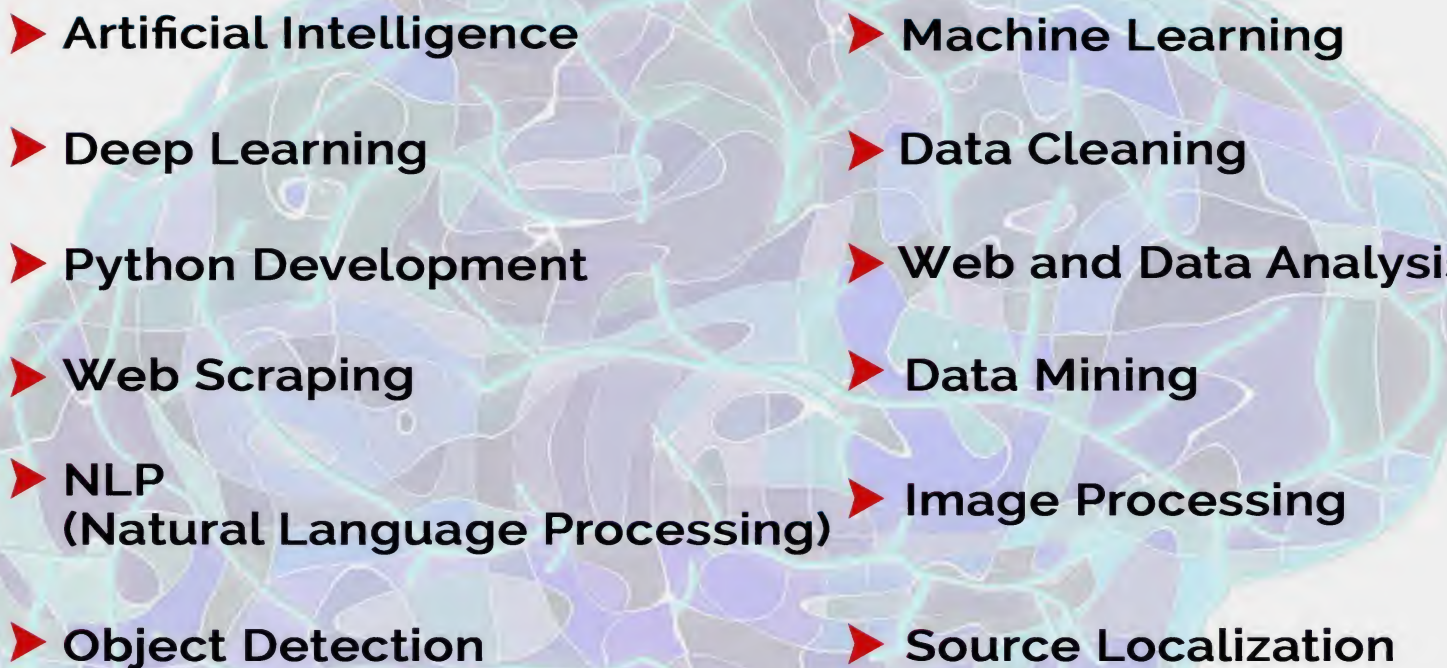

**Research Infinite Solution** is Webtunix Customized Software Development Division, which provides development services on web-based and client-server technologies. With Webtunix complement of software specialists, the company responds to needs, to opportunities and to challenges, providing a growing ability to support operations either on an on-site or off-shore basis in the following areas:

- ▶ **New Product Development**
- ▶ **Customized Products**
- ▶ **Product Enhancement**
- ▶ **Modification, Conversion & Migration of existing applications.**

Skills towards the use of powerful computers, advanced equipment, sophisticated software & systems development methodologies and the latest productivity tools are available with our software group to provide high-quality services in the above areas. Regular walk-throughout to ensure functionality, reliability and maintainability of software developed by us.

## OUR SERVICES INCLUDE:

- 
- 
- ▶ Artificial Intelligence
  - ▶ Deep Learning
  - ▶ Python Development
  - ▶ Web Scrapping
  - ▶ NLP  
(Natural Language Processing)
  - ▶ Object Detection
  - ▶ Machine Learning
  - ▶ Data Cleaning
  - ▶ Web and Data Analysis
  - ▶ Data Mining
  - ▶ Image Processing
  - ▶ Source Localization

## OUR CORE AREAS

- ▶ **Image Processing**
- ▶ **Face Detection & Recognition**
- ▶ **Finance**
- ▶ **Healthcare**
- ▶ **Betting System**
- ▶ **Object detection**
- ▶ **Video Recognition**
- ▶ **Sentimental Analysis**
- ▶ **Sports Prediction System**
- ▶ **Agriculture**
- ▶ **Web Speed optimization**
- ▶ **Stock Market Prediction**
- ▶ **Medical diagnosis**
- ▶ **Demand Prediction**
- ▶ **Anomaly detection**
- ▶ **Fraud detection**
- ▶ **Price Estimation tool**
- ▶ **Recommendation System**
- ▶ **Medical diagnosis**
- ▶ **Data Cleaning**
- ▶ **Image Processing**

## **MISSION**

---

To provide efficient and cost-effective solutions to complex information management requirements through innovative application of the latest technologies. By providing an informal yet highly professional environment to our workforce and nurture them towards identifying the organization's goals as their personal targets and to achieve excellence in every sphere of operation.

## **QUALITY PRODUCTS**

---

Webtunix Solutions committed to achieve customer delight through cost effective and customer- centric Quality A.I. Solutions, that are innovative and continuously upgraded in keeping with emerging technology trends by a motivated workforce, on time, all the time; resulting in maximizing stakeholder value. We are who listen to your needs and ensure alignment of your proposal.t

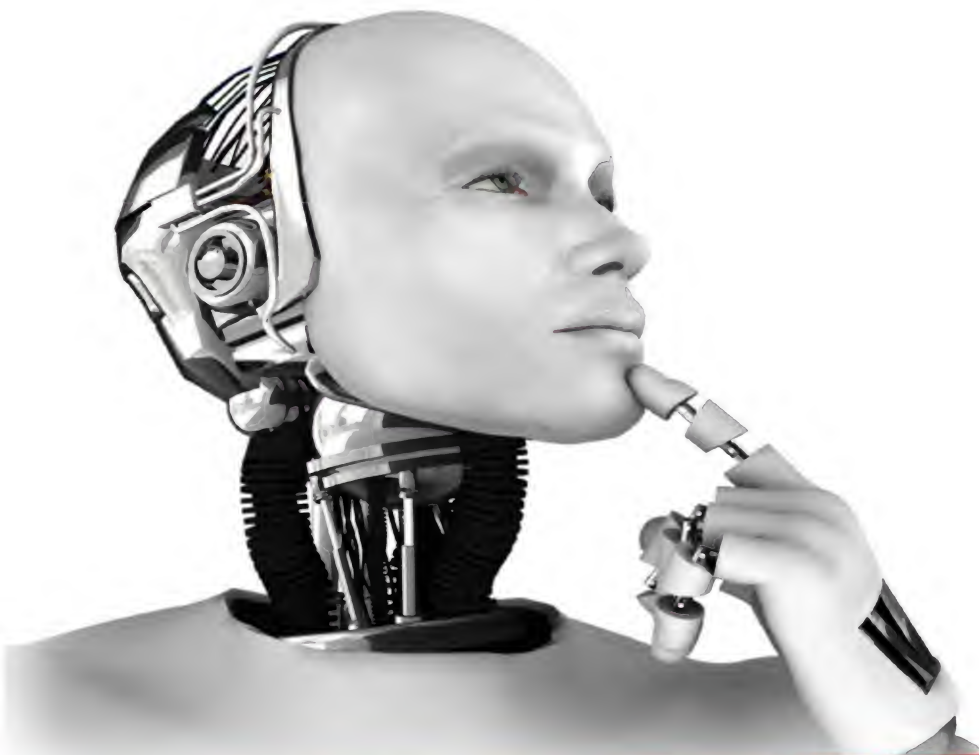

- On-going collaboration and performance evaluations to ensure maximum success of your proposals.
- Complete security to your data which is kept confidential.
- Affordable support options with competitive pricing.
- Proven expertise having years of industry experience.
- Latest technology tools.
- Integrated manner of operating on projects, improved customer's services due to flexibility towards different project.
- Right skilled and interested employees having ability to work on projects with passion.

## Why We

Whatever the nature of your business, plain sailing or complex, we would be delighted to help you. Get 24/7 support for your related queries. Drop in for a meeting or send an email and let us get in touch with you.

We serve our clients by delivering effective, superior value - adding solutions for analytical problems using our expertise in data science, Artificial Intelligence and Machine Learning. By adding these technologies to your work you may get better innovation. Our expert's data scientist's designs develop Machine Learning algorithms and tools that make your products and operations smarter. Our prime focus is on deep learning, data science, data-base prediction, image processing and object detection. Our experienced team having years of practice regards to above fields, thus we are a leading team for providing way to solve your problems in an efficient manner as well as within given time limit.
